

CENTRALE SOLAIRE
DES LISIANTHUS

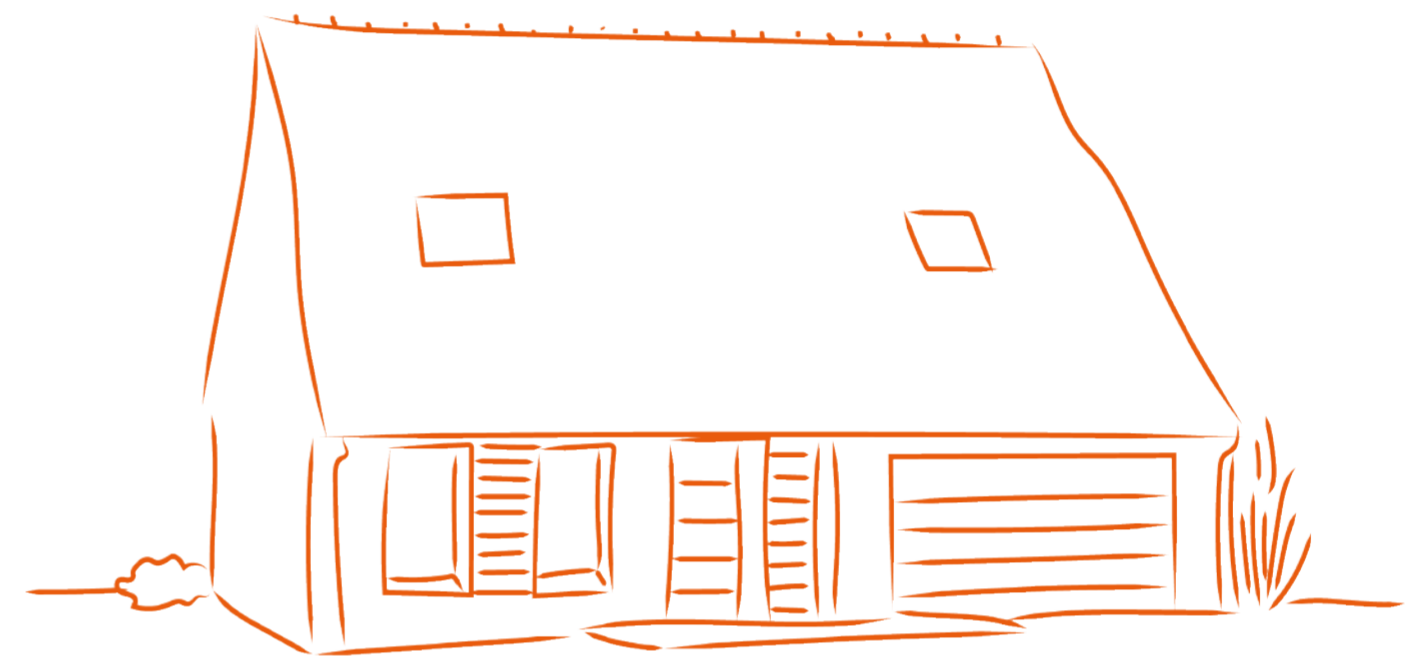

Centrale solaire des Lisianthus

DONNÉES PRÉVISIONNELLES

Environ **13 Mégawatts-crêtes**

environ
17 000MWh/an
de production

soit environ
+ 7 500 habitants/an
alimentés en électricité verte
(consommation hors chauffage)

ZONE À L'ÉTUDE

6 hectares
de panneaux solaires

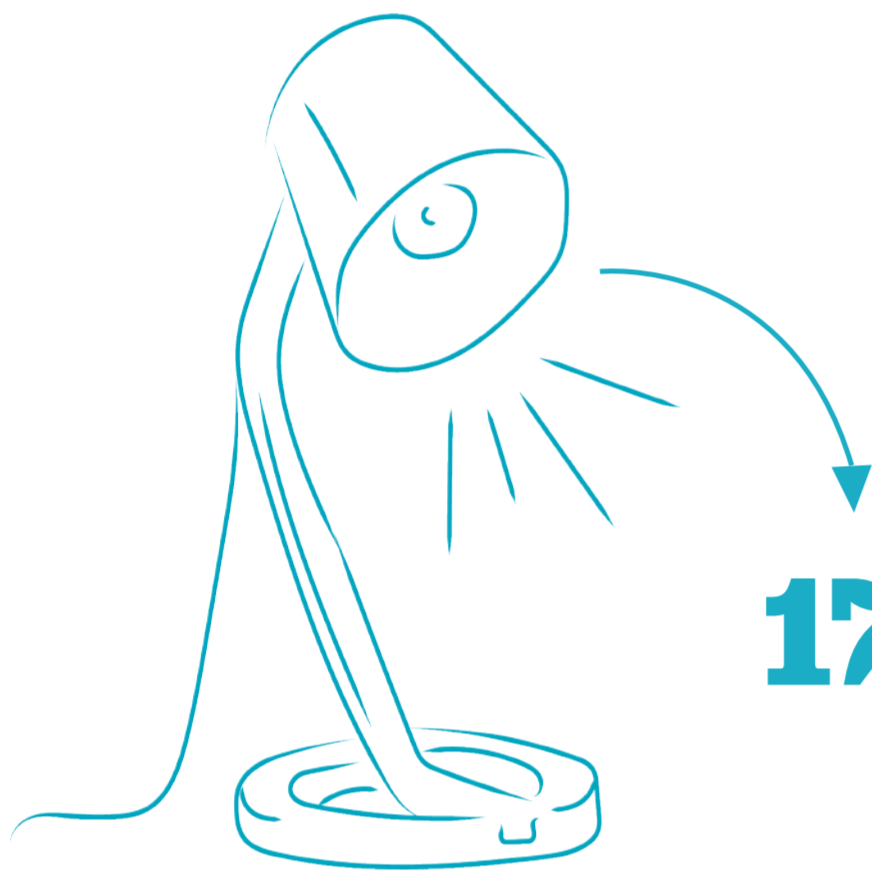

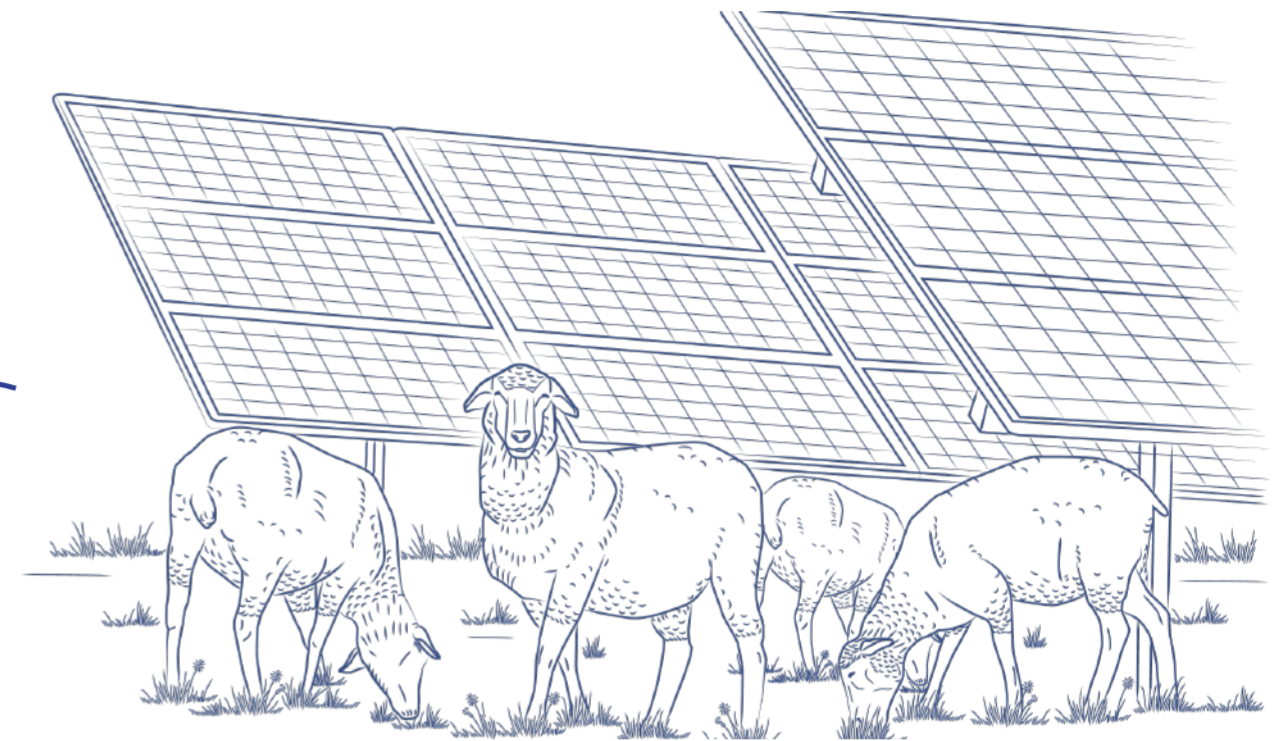

CENTRALE SOLAIRE
DES LISIANTHUS

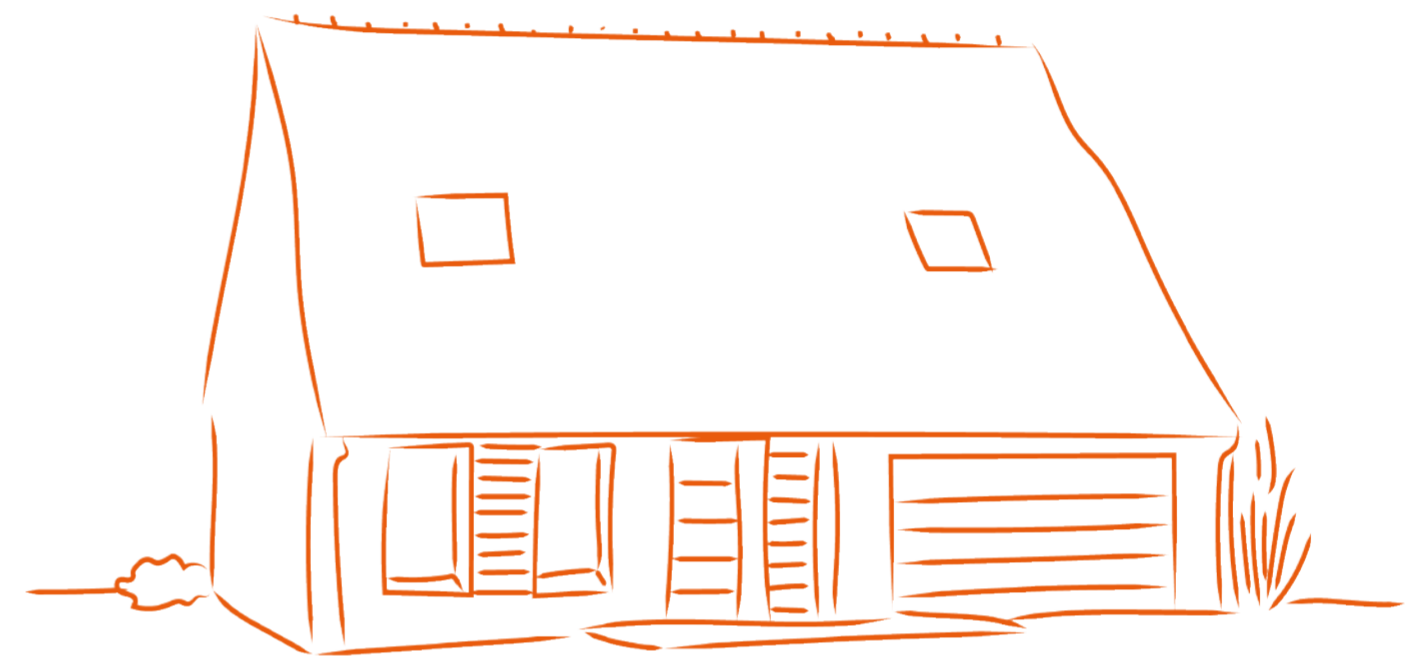

Lisianthus photovoltaic power plant

FORECAST FIGURES

Around **13 Megawatt-peak**

around
17 000MWh/year
of production

almost
+ 7 500 inhabitants/year
supplied with green electricity
(consumption excluding heating)

STUDY AREA

6 hectares
of solar panels
